

FMS: FLEXIBLE MANUFACTURING SYSTEM

Convenient, Customized, Cost-Effective

We are always willing to help our customers and possess the experience, equipment, resources and knowledge to offer sound recommendations to improve products, production and processes—while reducing costs. Learn more about our flexible manufacturing system (FMS).

DFF'S FMS CAPABILITIES BENEFIT THOSE CUSTOMERS THAT:

- Regularly need a specific part or parts that are from a larger product family
- Require support for overflow production

HERE ARE JUST SOME OF THE BENEFITS OF PARTNERING WITH DFF IN AN FMS CAPACITY:

Lights out machining

Reduce labor costs with our lights-out manufacturing capabilities, performed in our modern, climate-controlled facility.

Low volume / high mix

With an array of available machinery, we can accommodate multiple setups, even with little notice.

24/7 production

Benefit from our machines that operate efficiently and for as long as you need them to meet your production needs.

ABOUT DFF

Specializing in medium to high production of precision machined components and electro-mechanical assembly products, DFF works with customers to simplify designs, make products easier to produce and maximize the reliability and quality of the end product. Located on 23 acres in a regional industrial park at the crossroads of Western New England (Interstates 90 and 91), the DFF facility, which began in a 2,000 sq. ft. building, has grown to three buildings totaling 300,000 sq. ft.
